

Standard Report Listing for Births

The first type of standard report is a common set of reports that span four different population types. These are identified with a preceding pound sign and a letter code:

- #H - Unregistered hospital certificates (form HCA)
- #C - Registered county certificates (form LCA by county)
- #F - Registered county certificates (form LCA by facility)
- #R - Registered county certificates (form LCA by residence)

So to create the report code, prepend the following bases with the aforementioned pound sign and letter code. In the examples, only the #C reports are shown since the others are identical in format. The first set of base reports are:

- AGE1X TEENAGE CROSS TABS
- AGE2X MATERNAL AGE CROSS TABS
- BW1X BIRTH WEIGHT CROSS TABS
